

# ENVIRONMENTAL PRODUCT DECLARATION

as per ISO 14025 and EN 15804+A2

Owner of the Declaration	KONE Corporation
Publisher	Institut Bauen und Umwelt e.V. (IBU)
Programme holder	Institut Bauen und Umwelt e.V. (IBU)
Declaration number	EPD-KON-20230582-CBA2-EN
Issue date	22.12.2023
Valid to	13.04.2028

**UniSwing Compact / Robust / Fire**  
**KONE**

[www.ibu-epd.com](http://www.ibu-epd.com) | <https://epd-online.com>

## General Information

**KONE****Programme holder**

IBU – Institut Bauen und Umwelt e.V.  
Hegelplatz 1  
10117 Berlin  
Germany

**Declaration number**

EPD-KON-20230582-CBA2-EN

**This declaration is based on the product category rules:**

Drive systems for automatic doors and gates, 01.08.2021  
(PCR checked and approved by the SVR)

**Issue date**

22.12.2023

**Valid to**

13.04.2028

Dipl.-Ing. Hans Peters  
(Chairman of Institut Bauen und Umwelt e.V.)

Florian Pronold  
(Managing Director Institut Bauen und Umwelt e.V.)

**UniSwing Compact / Robust / Fire****Owner of the declaration**

KONE Corporation  
Keilasatama 3  
02150 ESPOO  
Finland

**Declared product / declared unit**

1 piece of the product: Automatic Swing Door Operator UniSwing Compact, consisting of the following items:

- UniSwing Compact door operator
- UniSwing Compact slide channel set
- UniSwing Compact basic cover
- Product packaging

**Scope:**

This Environmental Product Declaration refers to a specific UniSwing Compact automatic swing door operator. This EPD is also representative for the UniSwing Robust and Fire. The production site is located in Germany. Green electricity is being used at the production site.

Data represents the year 2022.

The owner of the declaration shall be liable for the underlying information and evidence; the IBU shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

The EPD was created according to the specifications of EN 15804+A2. In the following, the standard will be simplified as *EN 15804*.

**Verification**

The standard EN 15804 serves as the core PCR		
Independent verification of the declaration and data according to ISO 14025:2011		
<input type="checkbox"/>	internally	<input checked="" type="checkbox"/> externally

Dr.-Ing. Wolfram Trinius,  
(Independent verifier)

## Product

### Product description/Product definition

The automatic swing door operators are designed for single- or double leaf doors. Depending on the width and weight of the door leaf, the UniSwing Compact, Robust or Fire is required. The operators can be mounted with standard arm as push-version and with slide channel as pull-version. Apart from the extended cover, an integrated door coordinator is also available for double-leaf operators, which is also easily fitted. By using the upgrade card, the functional scope can be adapted to a variety of door situations.

### Features

- Flexible configuration of the functions actually required
- Inexpensive transport and easy assembly thanks to lower weights
- Low-noise application thanks to multi-stage gear
- Elegant design: dormakaba Contur Design with an operator height of only 70 mm

For the use and application of the product the respective national provisions at the place of use apply.

- ISO 13849-1
- DIN 18650-1
- DIN 18650-2
- EN 16005
- EN 60335-1
- 2011/65/EU ROHS3 Directive
- Machinery Directive 2006/42/EC

The CE-marking takes into account the proof of conformity with the respective harmonized standards based on the legal provisions above.

### Application

KONE swing door operators are suitable for various applications:

- For single- or double- leaf swing doors
- Assembly on smoke or fire doors: as pull- version with slide channels and as push- version with standard arm
- Automation of doors with low traffic capacity (Low-Energy Mode) and heavily frequented doors (Full-Energy Mode)
- High torque for full-automatic swing doors with radar detector control
- Suitable for internal and external doors

### Technical Data

The KONE swing door operators have the following technical properties:

Name	Value	Unit
Height	240	mm
Installation depth	152	mm
Maximum door weight ED 100	272	kg
Opening speed maximum	50	cm/s
Closing speed maximum	40	cm/s
Hold open time maximum	60	s
Supply voltage, frequency maximum	60	Hz
Power consumption	175	W
Class of protection	20	IP

Performance data of the product with respect to its characteristics in accordance with the relevant technical provision which can be applied are mentioned above.

### Base materials/Ancillary materials

The major material composition including the packaging of the product is listed below.

Name	Value	Unit
Steel	33	%
Aluminium	19	%
Paper	14	%
Zinc	14	%
Plastic	10	%
Electronics	9	%
Brass	1	%

The KONE swing door operators include partial articles which contain substances listed in the Candidate List of REACH Regulation 1907/2006/EC (date: 17.01.2023) exceeding 0.1 percentage by mass: yes

- Lead (Pb): 7439-92-1 (CAS-No) is used in the steel alloy. The concentration of lead in the alloy does not exceed 0,35% (by mass).

The Candidate List can be found on the ECHA website address: <https://echa.europa.eu/de/home>.

### Reference service life

The reference service life of the UniSwing Compact, Robust and Fire amounts to 10 years and depends on the application and frequency of use. Regular maintenance is advised to ensure the life expectancy of 10 years. For repairs or renewals, suitable spare parts are available. The swing door operators are tested and certified to EN 16005, meaning they are designed to withstand a minimum of 1.000.000 cycles.

## LCA: Calculation rules

### Declared Unit

The declared unit is 1 piece of the product: UniSwing Compact

Name	Value	Unit
Declared unit	1	pce.
Mass reference	13.54	kg/pce

### System boundary

The type of EPD is: cradle to gate with options, modules C1–C4, and module D (A1–A3 + C + D and additional modules: A4 + A5 + B6)

### Production - Module A1-A3

The product stage includes:

- A1, raw material extraction, processing and mechanical treatments, processing of secondary material input (e.g. recycling processes),
- A2, transport to the manufacturer,
- A3, manufacturing and assembly including provision of all materials, products and energy, as well as waste processing up to the end-of waste state.

### Construction stage - Modules A4-A5

The construction process stage includes:

- A4, transport to the building site;
- A5, installation into the building; including provision of all

materials, products and energy, as well as waste processing up to the end-of waste state or disposal of final residues during the construction process stage.

#### Use stage - Module B6

The use stage related to the operation of the building includes:

— B6, operational energy use

#### End-of-life stage– Modules C1-C4 and D

The end-of-life stage includes:

- C1, de-construction, demolition;
  - C2, transport to waste processing;
  - C3, waste processing for reuse, recovery and/or recycling;
  - C4, disposal; including provision and all transport, provision of all materials, products and related energy and water use.
- Module D (Benefits and loads beyond the system boundary)

includes:

— D, recycling potentials, expressed as net impacts and benefits.

#### Geographic Representativeness

Land or region, in which the declared product system is manufactured, used or handled at the end of the product's lifespan: Global

#### Comparability

Basically, a comparison or an evaluation of EPD data is only possible if all the data sets to be compared were created according to *EN 15804* and the building context, respectively the product-specific characteristics of performance, are taken into account. Background database: GaBi, SP40

## LCA: Scenarios and additional technical information

#### Characteristic product properties of biogenic carbon

Name	Value	Unit
Biogenic carbon content in product	0.27	kg C
Biogenic carbon content in accompanying packaging	0.41	kg C

Note: 1 kg of biogenic carbon is equivalent to 44/12 kg of CO<sub>2</sub>.

#### Transport from the gate to the site (A4)

Name	Value	Unit
Litres of fuel (per 1 kg)	0.00276	l/100km
Capacity utilisation (including empty runs)	55	%
Transport distance via medium truck	100	km

The product is transported via truck.

#### Installation into the building (A5)

Name	Value	Unit
Waste packaging (paper and plastic)	1,11	kg

#### Reference service life

Name	Value	Unit
Life Span according to the manufacturer	10	a

#### Operational energy use (B6)

Name	Value	Unit
Electricity consumption UniSwing Compact for 1 year	70.42	kWh
Days per year in use	365	days
On mode per day	1.8	h
Idle mode per day	22.2	h
On mode power	22.09	W
Idle mode power	6.9	W

#### End of life (C1-C4)

C1: The product dismantling from the building is done manually without environmental burden.

Name	Value	Unit
Collected separately waste type	12.43	kg
Recycling	8.18	kg
Energy recovery	1.89	kg
Landfilling	2.36	kg
Transport to waste management	50	km

The product is disassembled in a recycling process. Material recycling is then assumed for the metals and electronics. The plastic components are assumed to be incinerated with energy recovery. Electromechanics and minor proportions of residues arising from the recycling process are landfilled.

Region for the End of Life is: Global.

#### Reuse, recovery and/or recycling potentials (D), relevant scenario information

Name	Value	Unit
Recycling	100	%

Collection rate is 100%.

## LCA: Results

SQP	SQP	4.67E+02	4E-03	1.31E-01	1.59E+03	0	2E-03	7.57E-01	1.15E-01	-1.51E+01

PM = Potential incidence of disease due to PM emissions; IR = Potential Human exposure efficiency relative to U235; ETP-fw = Potential comparative Toxic Unit for ecosystems; HTP-c = Potential comparative Toxic Unit for humans (cancerogenic); HTP-nc = Potential comparative Toxic Unit for humans (not cancerogenic); SQP = Potential soil quality index

Disclaimer 1 – for the indicator “Potential Human exposure efficiency relative to U235”. This impact category deals mainly with the eventual impact of low-dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure or radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, radon and from some construction materials is also not measured by this indicator.

Disclaimer 2 – for the indicators “abiotic depletion potential for non-fossil resources”, “abiotic depletion potential for fossil resources”, “water (user) deprivation potential, deprivation-weighted water consumption”, “potential comparative toxic unit for ecosystems”, “potential comparative toxic unit for humans – cancerogenic”, “Potential comparative toxic unit for humans - not cancerogenic”, “potential soil quality index”. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high as there is limited experience with the indicator.

This EPD was created using a software tool.
